

HOW TO MOVE A PIANO

Here are some quick tips you can carry with you when moving a piano.

■ What you'll need

Padding
Stretch Wrap/Film
Dolly

■ STEP 1

Close and lock piano.

If your piano has a lock, use it to avoid the keyboard from flying open during the move.

■ STEP 2

Wrap with padding.

Be sure to wrap the entire piano from top to bottom with padding and then stretch wrap.

■ STEP 3

Move piano onto a dolly.

Most pianos have handles that are built into the back.

TIP: To avoid injury, tighten your core and make sure to lift the piano with your legs, not your back.
