

HOW TO PACK A MOVING TRUCK

Here are some quick tips you can carry with you when you have to pack a truck.

■ What you'll need

Blanket
Stretch Film (Wrap)
Motorcycle straps
(some trucks have these already)
Pillows

■ STEP 1

Stack boxes against the back wall.

Load them against the back wall so they're secure and don't slide while the truck is in motion.

■ STEP 2

Strap items down as you load with motorcycle straps.

■ STEP 3

Place mattresses and box springs against the sidewall.

Secure them with motorcycle straps to keep them upright and out of the way.

■ STEP 4

Slide mirrors and artwork between mattresses/box springs.

■ STEP 5

Wrap furniture with moving blankets and stretch wrap.

■ STEP 6

Pack a bag of the items you'll need the first day.

■ STEP 7

Fill empty space with pillows.

This will help everything remain tightly packed so nothing becomes dislodged during transport.
